# Will America's Wealth Evaporate?

Join Bill O'Reilly and Dick Morris for  
This Powerful Internet Broadcast to  
Make Sure YOU Are Not Caught Blindsided

Dear Terry,

Right now elected officials are making drastic and dangerous decisions that are impacting your wealth and financial freedom.

And you need to take necessary actions to not only find out the real story, but to discover ways to protect yourself.

The rampant fiscal irresponsibility of the Obama Administration has put each American citizen at risk.

As I write this letter:

1. **Our national debt has hit \$13 trillion\***. Even more alarming a president of the Federal Reserve is claiming **the real debt figure to be \$104 trillion** if you count all our entitlement programs (like Social Security and Medicare) and obligations, including federal pensions.
2. **Ben Bernanke is gambling with the dollar**. He set the Fed's printing presses on fire to pay for the aggressive bank and auto bailouts and the ensuing Wall Street crisis. And no effort has been made to fix this mistake.
3. **While China stakes its claim to global economic dominance, we are falling behind and remain dependent on them for our debt**. It's only a matter of time before they ask us to close our "bar tab" with them an amazing \$895 billion line of credit they have extended us. As the Chinese realize the dollar will fall, they will sell their U.S. bonds, sending us into a further tailspin.

President Obama and his team have mismanaged our economy. They have played a dangerous game of poker and now their bluff has been called.

Even Warren Buffett has said repeatedly what every honest economist knows: America is on an unstoppable path toward inflation.

## In Fact . . . Inflation Has Already Been Striking Us While the Mainstream Media Has Slept Through the Threat!

Since 2008 we've seen a startling 135 percent increase in the money supply.

This drastic inflation of our dollar will eventually cripple the wealth of American citizens when it evolves into price inflation at the grocery store, gas pump, and on just about anything you buy.

Nobel Prize winning economist Milton Friedman put it best when he explained that inflation acts like a drunk with alcohol.

At first there is euphoria and happiness. All seems right.

And because of this the drinking continues. And before long it's simply too late and the hangover strikes!

### America is About to Come Face to Face With the Worst Economic Hangover in More Than a Generation...

Rampant spending . . . overzealous borrowing . . . and planned devaluing of the dollar have taken us to the brink.

Maybe you are not concerned. Maybe you don't see major inflation yet?

**Don't be fooled.**

Obama and Congress think they can buy prosperity with intentional inflation.

They also think they can dig us out of this Federal debt abyss; the next inevitable "solution" President Obama will conjure up will be to tax his way out of it.

### President Obama Will Usher in One of the Most Massive Tax Increases in History on December 31!

This is when the Bush tax cuts expire.

An immediate 10 percent tax increase across the board will strike citizens of all income categories.

He knows the capital gains tax will rise by almost 50 percent and the tax on dividends as much as 250 percent!

His Obamacare plan already calls for more taxes, including a \$28,000 tax increase for millions of Americans.

And now Obama is openly talking about a new "value-added tax" which would be tantamount to a national sales tax. It is clear that the mentality of both the Obama White House and the Pelosi-run Democratic Congress is pro-taxes.

**P.S. Here are some alarming facts you need to be aware of:**

- **\$117,000** That is how much each taxpayer (**YOU**) will have to fork over in order to pay off our national debt (does not even include state debts) according to U.S. Treasury.
- **95%** That's how much value the U.S. dollar has lost in the past 100 years.
- **26%** That is how high some respected economists estimate our unemployment to be. Although governmental statistics state that the official unemployment rate is around 10%, other sources that include underemployed, distressed workers, etc., are more accurate.

Sitting idly by is no longer an option. Get powerful solutions for these uncertain times.
