

**A Rogue Group of Average Americans
Has Secretly Grown Filthy Rich by Shadowing
Wall Street Insiders, Washington, D.C. Bureaucrats,
Even the U.S. Military to Become . . .**

The *Robber Barons* Next Door!

**Join Them As They Pull Off
the Greatest “Heist” in Human History!**

Your Potential Reward:

\$137,000 (or more) Legally in **Your** Pocket in the Next Year Alone!

Dear Fellow American:

Sean Hyman
Newsmax Financial Brain
Trust Member

Every day, a \$3.98 trillion global “heist” is committed by big banks . . . even bigger governments . . . and formidable insiders.

And for the longest time, these powerful forces single-handedly hoarded all of the spoils of this incredibly lucrative raid.

But now a small alliance of investors has begun to secretly shadow these groups and some are quietly reaping sizable payoffs for being accomplices in their international plot.

These are average folks . . . they break no laws . . . their actions are 100% legal. And they are becoming incredibly rich **very** quickly.

Today, you have the opportunity to join them — and your “take” could be as much as \$137,000 or more in the next year alone as you “break into” the biggest vault the world has ever seen.

This is how money has always been made . . .

The 19th century witnessed the empires of Spain, Portugal, China, and Rome crumble as Great Britain and the United States forged ahead.

Cities were built . . . medical breakthroughs discovered . . . and the railroads aided the American settlement of the western United States.

And during this time, a select few staked their flags in the ground and became profiteers of such levels that they are now a part of the canvas of American history.

Their names are of the household variety to all of us: Andrew Carnegie, Cornelius Vanderbilt, JP Morgan, and John D. Rockefeller, among others.

Titans who rose up from obscurity to attain vast wealth by exploiting the uncertain and tumultuous periods they lived through.

A term was coined for these incredibly successful (and cutthroat) businessmen . . .

they were called “robber barons.”

Their last names, which now decorate the halls of major universities and charitable institutions, are synonymous with excessive riches. Their heirs still influence politics and society.

And today . . .

The Notion of the Robber Baron Is Far From Dead . . .

In fact, an entirely new generation has begun to emerge . . . and its member's wealth is beginning to rival their 19th century predecessors.

But unlike the tycoons of years past, these modern-day robber barons are not building their legacies in oil fields, steel plants, real estate . . . **or even the stock market.**

Instead, their burgeoning empires are created from exploiting (legally robbing) a market that was completely cut off to them, until a few years ago.

And rest assured . . .

These post-millennium robber barons aren't silver-spoon, trust-fund beneficiaries.

They are your friends and neighbors, and they now literally have the world economy in the palms of their hands, because of what I have to reveal to you today.

Without donning a ski mask . . . without taking even one penny from the innocent . . . without even mildly bending a law . . . they've quietly logged onto their computers and, from the comforts of their own homes, made their way into this very elusive vault.

One that is stockpiled with a fresh \$3.98 trillion each day.

If you want in, and you have the appetite and the financial ability to take on some risk, your piece of the “take” could be quite sizable.

**It Is Possible for You to Grab \$137,000 (or more)
in the next year alone . . .
with only a tiny grubstake to start with.**

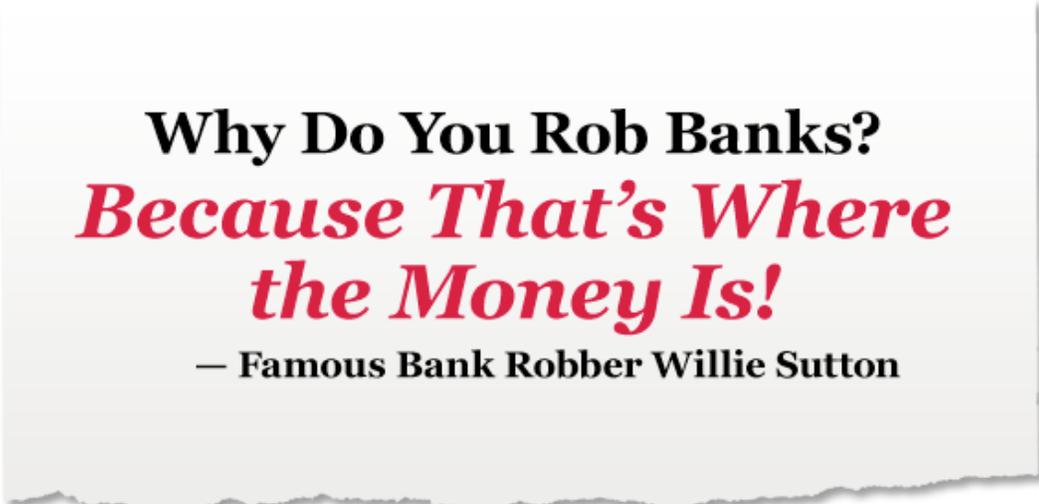

In the right circumstances, fortunes can be made with as little as \$50 to \$250 . . .

And with the incredible force of leverage, you can turn that \$250 **instantly** into \$100,000 of investment power.

Sounds impossible right? Keep reading . . . you'll see it happens every day thousands and thousands of times. You just never got a chance to take part in it before now.

You could even begin to make serious money within a few days of reading this letter.

Maybe even 24 to 48 hours. I've already set it up for you.

Why Do You Rob Banks?
***Because That's Where
the Money Is!***
— Famous Bank Robber Willie Sutton

Imagine a 24-hour-a-day market so vast, you could combine every trade done on every global stock market, multiply that figure by 10, and that wouldn't even equal its incredible potential each and every single day.

It's 50 times larger than the New York Stock Exchange alone.

Its liquidity is unprecedented. And no other market creates as many opportunities for massive (and consistent) triple, **even** quadruple digit gains in a matter of weeks or in some cases days.

Plus if you know the "secret" . . .

**Imagine setting up a virtual cash machine
to run around the clock while it silently extracts
stacks of money from this global vault and deposits**

it **discretely** in your bank account!

A few computer keystrokes can get you started. If you choose, you can even execute your trades automatically without having to be in front of your computer.

You make all the decisions on how and when to invest, putting the power of your investments in your own hands.

Sounds Too Good to Be True, Right? Of Course It Does!

And it actually was to the average investor until very recently. Most folks simply did not have enough investment “muscle” to run with the powerful forces who dominate this lucrative and elusive market.

Not anymore though.

The door has been flung wide open, and shrewd investors with as little as \$50 to \$250 can play in this market and increase the chance to grab huge payouts.

I’m talking potentially six . . . and eventually seven figures here.

And it’s not a dream. It’s a real opportunity.

Christopher Ruddy, the CEO and editor in chief of Newsmax, and I have made it possible for you.

Christopher Ruddy is so confident in the rewards to be had from this legal caper, that he put **\$1.5 million of his company’s money ‘on the line’ to make this opportunity available to you.**

And I’m inviting you to join this international ‘raid’ now..

(In fact, I’ll let you in on this ‘heist’ for free!)

The vault these run-of-the-mill investors are raiding concerns the world currency

market also known as the foreign exchange market (FOREX).

It's the biggest, most liquid, and, in my opinion, one of the most ridiculously profitable plays for your investment dollar right now.

And it's also one of the most misunderstood. I've heard it stated that it's too complicated, expensive, and risky to be in FOREX investing.

Certain powerful groups like to peddle these misconceptions. To keep you "out of the game," so to speak.

Fact: It's not complicated . . . any serious investor can have the chance at incredible success.

Fact: It's dirt cheap . . . (unless putting \$50 to \$250 into each trade is "too rich for your blood").

Fact: Yes, it has risks involved with it — and I explain more on this later. Just understand that no investment is risk free, but we will give you the tools to help you manage the risk, because currency investing has powerful elements to it that no other investment has.

I'm going to show you how you are going to have the potential to make a great deal of money by becoming an accomplice to this global FOREX "heist."

These powerful groups will no longer keep you from reaping currency riches because I'm joining the fight for you. You'll now have me in your corner . . .

I'm an 'insider' from this influential coalition. And I'm going to out their secret.

Using my closely guarded investment strategy you'll attack this 'hidden market' en route to having the chance to grab an

"FOREX is perfect since there are thousands of possible investment options and more than 100 ways to capture profits as the dollar declines. It's the most direct way possible to bet on a nation's economy, and the potential returns are truly unlimited"

— Michael Carr

Retired U.S. Air Force Lieutenant Colonel and Modern Day "Robber Baron"

enormous payout from a small stack of coin.

I was once just like you. You won't even believe how I got my start (I'll tell you in a few moments).

Just know that the people who have become accomplices in this international “robbery” of the currency markets are now making a killing.

Like Andrew K. of Catskills, NY*, a 54-year-old farmer and avid trout fisherman. No different than you or I, he used this 100% legal FOREX “heist” to rack up a nest egg of more than \$3 million.

Another modern-day “robber baron” is Yeo H. He tried to “play by the rules.” He wanted to supplement his government job’s income by going into traditional stock market investments.

After blowing through \$50,000 on risky tech stocks and overly volatile options plays, he cracked the code to the international currency vault.

The Result?

**He used a \$10,000 stake and grew it into
\$300,000 a year later.**

**In fact, right now he’s making
\$20,000 a month in income.**

Needless to say, he’s no longer a government employee.

Ray F., a 43-year old man from Elk Grove, Calif, is another now-wealthy accomplice in this venture. And because of his currency investing, Ray not only retired from his 14-year career in real estate but **also turned a \$50,000 stake into a seven-figure payout.**

Andrew, Yeo and Ray were average investors. They started out with meager resources and have built nest eggs fit for envy.

Currency’s Most Wanted List:

**They’ve Hidden This From
You
for too Long!**

Suspect #1: The Biggest Organizations of Bookies on the Planet — This small alliance of massive banks (called interbanks) control who gets in and who gets out of the currency game. Everybody else used to get long-shot odds and ridiculous hurdles to overcome to make a profit (not you anymore though).

They “broke” into the \$3.98-trillion-**a-day** currency vault, and they haven’t looked back.

You have an incredible opportunity to join this fraternity of currency investors who have broken the code and unlocked huge profits.

And the time for you to strike is now because these robber barons are making their way into the vault once again . . . To join in this raid [Click Here Now](#).

If you listen close enough, you can hear the subtle ticks of the vault’s dial being turned.

This time, you are going to use this “heist” to create an opportunity to make an unfathomable amount of wealth, by exploiting the currency market. Your goal is simple: to capitalize on the decimation of the American dollar.

And I, of course, will be joining you.

This calamity will be happening regardless of whether decide to profit from it. I’d personally rather be on the winning side. Wouldn’t you?

The American dollar is already in its death throes.

CNBC summed it up best when it pronounced . . .

Suspect #2: Washington D.C. — The Federal Reserve secretly has stashed 31% more FOREX right now than it was carrying in 2005.

Members know that, once the dollar drops further they’ll be sitting on a veritable gold mine when they sell these currencies back for an enormous profit.

Even the U.S. military is getting its “taste.”

In a recent filing with the General Accounting Office and Committee on Armed Services, a military director recounted saving \$908 million by implementing calculated FOREX investing into his budgeting efforts.

Suspect # 3: Powerful Insiders — In an “under the radar” report to Congress aptly titled the “Bank Secrecy Act,” the GAO actually buried in fine print a provision not to require banks to report currency transactions of powerful customers as long as they make at least eight large currency moves a year with the bank.

So they make sure to protect their “friends.” And keep their profits off the government records.

Warren Buffett has used FOREX to pile \$2.3 billion of profit into his coffer over the past few years.

George Soros is the über-example of the wealth to be had with FOREX, as he has used it to amass his \$11 billion net worth.

They Can’t Keep You Locked Out Any Longer . . . [Join Their Profit Raid!](#)

The Dollar is the New Peso. . . — CNBC

That's actually an insult to the peso as it has gained as much as 33% in value on the dollar in 2009.

Because of the dollar's devaluation, \$1 trillion of the retirement savings of Americans in the last year alone has been flushed down the drain.

Any money you have invested in CDs, money markets, bonds, stocks . . . even your 401(k) is disappearing as the dollar keeps dropping.

Unless of course you were in on the 'heist.'

Look at what **a measly \$250** could have netted you based on simple movements in currency prices . . .

Using the weak dollar to profit from the euro

- \$1,060 payout in two weeks — a 324% gain
- \$2,790 payout in six days — a 1,016% gain
- \$8,310 payout in nine days — a 3,224% gain
- \$2,280 payout in 16 days — an 812% gain

Playing the down dollar against the British pound

- \$4,180 payout in nine days — a 1,572% gain
- \$5,720 payout in 18 days — a 2,188% gain
- \$3,370 payout in 17 days — a 1,248% gain

Capitalizing on the fragile dollar against the Brazilian real

- \$1,250 payout in two weeks — a 400% gain
- \$6,280 payout in 13 days — a 2,412% gain
- \$3,460 payout in 10 days — a 1,284% gain

These are potential gains that could have been available to you just by turning your computer on . . . finding out how FOREX works . . . making a few timely keystrokes . . . and “breaking into” the world currency vault.

Conceivably, a \$2,500 grubstake could have ballooned into \$38,700 in a very short amount of time. Very simple. **[Grab your chance at profits now!](#)**

These are just a small selection of hypothetical trades that could have been made . . . I could list thousands of such trades in many different currencies that have happened in this year alone that could have paid out huge returns. I also could show you trades that have lost money. That's the reality of the market. Which is why you need expert guidance. And I believe I have cracked the code and now you have the chance to make very sizable returns.

But I'm not here to talk about hindsight 20/20 trades all day . . . I'm here to show you how you can give yourself the opportunity to add these types of gains in the future to your portfolio.

Now, as I mentioned before, all investments carry certain levels of risk and I'll talk about some of those risks in a moment. But I'm going to show you steps you can take to manage your risk and thus give yourself better prospects for becoming incredibly wealthy with currency trading.

You can see right away, from the results above, how these post-millennium robber barons are building such massive wealth so quickly (and with such minuscule amounts of cash outlays).

Instead of going for lump-sum, astronomical payouts, they dissect the market with a very precise and easily repeatable method that generates consistent and sizable cash returns that grow and grow over time.

**You possibly could make an extra
\$300 to \$400 a day using the FOREX market.**

**Which could turn into an
extra \$2,600 to \$2,800 a week.**

**Which could then potentially blossom into
\$137,000 to \$145,000 in the first year alone.**

The best part is that you'll need to invest only \$250 or less to grab this \$300 to \$400-a-day payout.

I'll explain this further in a minute.

And this opportunity is not just for the usual list of billionaires. Some of those who will cash out to huge paydays may be your very neighbors. Just like Andrew, Yeo, and Ray from earlier in this letter.

Or John K. before he discovered this **\$3.98 trillion**-a-day market, he worked for a clothing line that specialized in religious apparel. His wife stayed at home to raise their two children.

But he decided to grab his take from this massive vault, and he became a multi-millionaire in about seven years time. In one year alone he earned \$2.25 million.

Rob B. and his wife who live in San Francisco, took their more-than-generous piece of the action too. Rob, a former financial recruiter, and his wife, had fallen into crippling debt.

It got to the point where they were defaulting on their loans and missing their rent and car payments.

But luckily, they discovered this secret currency 'robbery' and not only got out of their financial binds, but also added an additional \$5,000 to \$10,000 a week to their bank account.

These robber barons' results were extraordinary. Obviously not everyone has had, or will have, their level of success. Some folks didn't know what they were doing. Others took too many risks. Everybody needs guidance at first when entering this market.

And that's why I'm here to help.

I want you to become the next post-millennium robber baron.

In fact, as I mentioned earlier, I've partnered with Christopher Ruddy who has put \$1.5 million of his company's money behind this initiative to help ensure it becomes a reality for you.

I can't think of a better way to convince you that currency riches are attainable to even the most modest of investors, than to create an opportunity for everybody to

profit and put serious money behind it.

And then give it to you for FREE!

Before we go further, let me tell you why I think you are the right kind of investor for this opportunity.

Of all the people who begin to read this letter, 99% will never even make it this far. They'll read the previous pages and decide that they'd prefer to sit on the sidelines.

They'll assume that the currency market isn't right for them. They'll prefer to invest "with the herd." Which is a monumental mistake, because anybody from the greenest of investors to the most seasoned of pros can capitalize on this opportunity.

Plus, most of the "heavy lifting" in this international currency "heist" is going to be done for you.

But this letter isn't meant for that 99% . . . it's meant for you. A member of the 1% who are ready to do what it takes — who have the guts and appetite for risk — to use the volatile global economic climate (and the powerful forces behind the downfall of the American dollar) for a shot at becoming incredibly wealthy.

And, for that 1% of you I'm urging you to get into the currency market right now so you can have the chance to become a post-millennium robber baron . . .

**But Currency Trading is too Complicated . . . too
Time Consuming . . . and too Expensive for Me to
Profit From, Right?**

No . . . No . . . and No!

Myth #1 — Too Complicated:

It's not complicated at all. It's as simple as buying one currency by using another currency through your computer. And, to make it even simpler you can choose to automate the trades by entering simple instructions into your online account.

When the exchange rate on the currency goes up or down in tune with your investment . . . you could make money. Just like stocks. With currency, very tiny moves with those exchange rates can make you very large payouts. The trades could also lead to loses — which leads to part of this "complicated" misconception.

That is why you need my expert advice.

By exploiting the FOREX market I believe you can use a multiplying factor to supercharge your gains . . . Here's how it works.

You buy a block of currency at a certain exchange rate. You can spend as little as \$5 . . . \$10 . . . \$50 . . . or, for our example, \$250.

For every point (known in currency as a PIP) that currency play moves in your direction, that's \$10 in your pocket.

And these points are very subtle moves.

In fact . . .

**If a trade moves
1/10th of a penny . . .
that's \$1,000
in your pocket . . .
INSTANTLY!**

A 300% return instantly off of a paltry \$250 investment. These types of moves happen constantly. I'm talking countless times each day.

Pretty simple there.

**And I'll make it simpler . . .
in a few minutes I'm going to show you
how to claim a **FREE GIFT** I've created
to provide you with everything you need
to dominate this market.**

Myth #2 — Too Time Consuming?

Like I mentioned earlier, you don't even need to be in front of your computer to execute the trades. In the right circumstances, you can spend 10 minutes a day investing and still reap big profits on smart trades.

With a few simple keystrokes, you can put in sell points as soon as you set up the investment . . . not just for gains but also safety net exit points. When the trade hits

these automated sell points the trade sells regardless if you are at home, the office, or out having an expensive dinner.

And since it's open 24 hours a day, nearly seven days a week, you can work when you feel like it.

**This allows you to trade
on autopilot and instead of
simply working . . . you are
working smarter.**

Myth #3 — And Too Expensive?

With FOREX, you can use small sums of money to secure massive piles of cash by using incredible leverage — if you trade wisely.

Just imagine that you have a large collection of those bank moneybags and each one is packed full with cash. Now you as a person could carry only one (maybe two) of these heavy bags.

But using leverage is like using one of those bank security trucks as your getaway car. With this powerful truck, you can take all the bags with you because you can carry 400 to even 500 times what you could if you were just grabbing the bags yourself.

In currency terms, you potentially can turn each \$1 you invest into as much as \$400 to \$500 of buying power instantly . . . or \$250 . . . into \$100,000.

That, in a nutshell, is leverage. Another great element is you can manipulate this “buying power” to whatever you feel comfortable with.

So basically, you are behind the wheel of a powerful truck packed with bags of money all for the taking.

Now, we'll get to the risks involved with using leverage. The more leverage you use, the more risk you assume. But what's great about currency investing is there are very strong ways to manage this risk that aren't available with other investments.

And talk about cheap . . . as an added bonus, there are no fees or commissions with

currency trading. So you are cutting out all of those brokers and money managers whose sole purpose in life is to rob you of every penny they can.

Hidden From You Until Now: The Secret Weapon of the FOREX Market . . . DAILY INTEREST PAYOUTS!

This is why the rich and powerful LOVE the global currency market. Who cares about quarterly dividend payouts? . . . Forget about that dusty and outdated “buy-and-hold” mentality. With the FOREX market you literally are handed the equivalent of **daily** dividends in the form of interest payments.

Here's a simple explanation of how it works.

Say you have two currencies of two nations. Each nation has a federal interest rate. Say Nation X's is 6% and Nation Y's is 2%.

That leaves a 4% difference between the two . . .

Now I just told you how you can lock in \$100,000 of investment power by taking only \$250 out of your pocket . . .

Well, you will get that 4% difference handed to you off of the \$100,000 amount . . . Not the \$250 you shelled out.

And it will be paid out to you in daily increments as long as you hold the currency and rates don't change.

Incredible, right?

Imagine, in this scenario, you hold that currency for a year. The interest alone would pay you \$4,000 off of \$250.

**You are reading that correctly. You possibly could
make \$4,000 in interest alone each year off of
a \$250 investment.**

And that doesn't even include the potential profits you could make if you sell the currency trade for a gain. And even if the trade goes against you . . . the interest payments still might allow you to come out as a winner in the deal. Great benefit, right? Of course!

So Let's Talk Quickly About Goals!

If you want to set a goal to average \$300 to \$400 a day, you will need to make an average of 30 to 40 “pips” a day. And this won't require much initial money out of your pocket at all. You've seen how you can get into trades for as little as \$50 to \$250.

And that doesn't even include the daily interest payments you could've received. As the saying goes, that's an “extra cherry on top.”

Now some days you will lose money. Like any investment, you won't always win. There is risk associated with currency investing.

But if you set a goal of 30 to 40 pips a day, considering that you will have days that go against you, then your goal for the first year should be \$137,000 to \$145,000. And you can set bigger goals every year after that as you become more comfortable investing and you go for bigger daily “PIP” payouts.

It's not complicated. But it does take a desire to follow easy instructions to get started . . . then you make your decisions on your computer which can automate a lot of this for you. I assure you it's very simple to do once you actually execute it. I just want to make sure you grasp the big concepts here.

In fact, look at me as your “secret weapon” because I will work for you until you are comfortable going at it alone.

OK, the Next Big Question Is: How Risky Is Currency (FOREX) Investing?

Let me be as clear as possible with you on this. If you are for looking for a fail-proof, risk-free investment — or even the level of risk associated with most stocks or bonds . . . this is not for you. Currency investing is speculative.

Currency investing uses leverage, and leverage equals more risk, plain and simple.

No investment completely eradicates risk, and you can be exposed to losses in your portfolio. Those who tell you they have that “cure” also probably would try to sell ice to Eskimos. They are con artists.

You are about to be handed a virtually unstoppable currency trading strategy (for FREE) developed by none other than a former church minister . . .

But currency investing does have a few safeguards built in that aren't found in any other investment opportunities.

1. **Small up front investments** — You can use \$5, \$10, or \$250 out of pocket to get into these trades. So you can choose to put small amounts of money “on the line.”
2. **You can choose your leverage amounts** — If you want smaller leverage, you get smaller gains, but also smaller risks of losses. This is how I recommend everybody start out with currency investing. Don't go for home runs. Go for steady hits.
3. **Incomparable liquidity + Round the Clock + Ability to Automate Trades** — The market is \$3.98 trillion a day. The trading hours are basically 24 hours a day nearly seven days a week. And you can enter into your computer predetermined exit points for winning and losing positions. No other market has all of this built in to it.
4. **Daily Interest Payments** — To augment the gains you can make from the trade itself, you also will be rewarded with daily interest payments on the currency. These interest payments can add triple-digit returns to the gains you will realize from the trade already. And in the event a trade goes against you, the interest payments can act as a cushion to actually turn losing currency trades into winners. An incredible risk-management benefit.
5. **Rumors and Poor C-Level Executive Decisions Can't Hurt Your Gains** — Unlike the stock market, currency trading is not affected by bad earnings or poor executive management. The market is too big to be manipulated by individual events such as these.

Let me break this down a bit further with an example:

Say a company you own a stock in says it is going bankrupt (General Motors, Lehman Brothers, etc.). That stock will begin to sink like the Titanic. You have only a few trading hours in a day to get out of that trade. And nobody will be there to throw you a life raft anyways by acquiring your stock. Others are going to wait until it hits rock bottom before jumping in.

But when a currency play goes against you, you already could have set up a predetermined exit point, and because there is literally a whole world of potential buyers and you are virtually assured it will sell . . . Sure, you can put a sell order in for stocks as well, but if there's not a buyer . . . tough luck. With currency investing (FOREX), there is almost always a buyer. I've never heard of or experienced a situation in which there wasn't one.

So you can manage your risk easily and open the door to . . .

Making Millions the Easy Way!

- ✓ **Simple** — Just use your computer to buy one currency with another currency. The exchange rate moves a tiny bit in your favor . . . you get paid.
- ✓ **Always a Buyer** — Allowing for serious risk management.
- ✓ **Open 24 Hours a Day** — Nearly seven days a week.
- ✓ **Potential for Big Payouts . . . cheap entry costs** — The chance to build a massive pile of cash with little money coming out of your pocket. Plus, grab daily interest payments deposited into your bank account.
- ✓ **Always a Bull Market** — Currencies always are going up and down. So there is always money for the taking if you make the right trades!
- ✓ **No Buy/Sell Commissions** — greedy brokers and money managers keep their hands off your wealth.
- ✓ **Set Your Trading on Autopilot** — put a few keystrokes into your computer and you instantly have the potential to make a bundle whether you are in front of your computer or on a beach.
- ✓ **Any Serious Investor Can Do It** — you don't need an ivy league education to become the next modern-day robber baron.

To capitalize, you'll simply follow a very simple blueprint for duplicating currency success over and over again, regardless if you are a beginner or seasoned pro to FOREX investing.

As I mentioned before, Christopher Ruddy is so confident in the prospects of what I am sharing with you today that he's put \$1.5 million of his company's money behind it.

And I hope you join me for this ride.

It's time for you to share in their success!

So, now all you need is a true expert in the field to help lead you into the vault.

Former Church Minister and Financial 'Bagman' to the Über Wealthy Is Your Guide to Immense Currency Fortunes!

One of the last places anyone would think to look to find the person who would lead them on a profit "raid" of epic

proportions is to the pastor directing a sermon to his loyal followers in church.

But that's where I got my start, and it's also why I thrive at helping average folks excel in currency trading.

I began my career in the church as a youth group leader and I worked my way up to becoming a full-fledged pastor.

But as most know, the life of ministry is one of little financial reward, and I had a wife and children to support. I had to branch out into a career that I could use to take care of my family.

But without an education from one of the "rich-kid" schools, I found nothing but closed doors. Then one day in the HR office at Charles Schwab, I was given a shot to start at the very bottom in the customer service department.

Four years later, I was managing a team of 19 stockbrokers and had acquired nearly every financial license under the sun.

Coming Up!

**I'll hand you a
FOREX blueprint
that'll give you
the opportunity
to pocket a
\$137,000 payout
for FREE.**

And now, after decades of delivering incredible results and after developing a successful, proprietary investment strategy, I've become the "personal currency bag man" for a small circle of powerful (and immensely wealthy) offshore investors.

My incredible success is why Christopher Ruddy decided (almost on the spot) to put \$1.5 million behind this venture today to create a whole new breed of robber barons.

This is for investors who aren't willing to allow a dying dollar to drain every penny they've worked so hard to earn. Investors who are ready to stand up and "flip the tables" on Washington, D.C. and Wall Street while grabbing their lucrative payout.

So what's the plan of attack?

**Follow the FOREX Diamond Factor
en Route to Your Dream of
Grabbing a Seven-Figure Payout!**

Imagine you have a one-dimensional diamond. It has four points each of equal importance. Each critical for identifying a possible currency (FOREX) trade.

FOREX Diamond Factor

When all four indicators line up exactly right, they alert me that a currency trade is ripe with potential profits. And that's where I'll make you money.

Look at the recent profit opportunities I've created for my clients with this FOREX strategy by investing in . . .

Turkish Liras	Canadian Dollars	Japanese Yen
349.84%	292.24%	252.04%
343.68%	273.88%	183.52%
257.40%	176.88%	154.88%
163.60%	128.20%	152.36%
127.28%	79.08%	91.36%

By the way . . . these gains were over a recent, two-month time frame, and **I wasn't in any one of the trades above for more than two weeks.** Imagine how big your payout is if you take these quick hit returns and reinvest them in more currency.

When we first launched this \$1.5 million initiative a few months back I quickly delivered 187%, 357%, and 92% winning payouts to lucky subscribers.

How exciting is that! And this is just a snapshot. I've got pages and pages of my recent trades that have these types of results. Like with any investment, I have had losing trades, but I am confident this strategy will continue to make money in currencies, especially with the turbulent times ahead for the U.S. dollar.

If you can turn on your computer and check your e-mail . . . you can master this market. It's that simple. Because **I make it easy for you.**

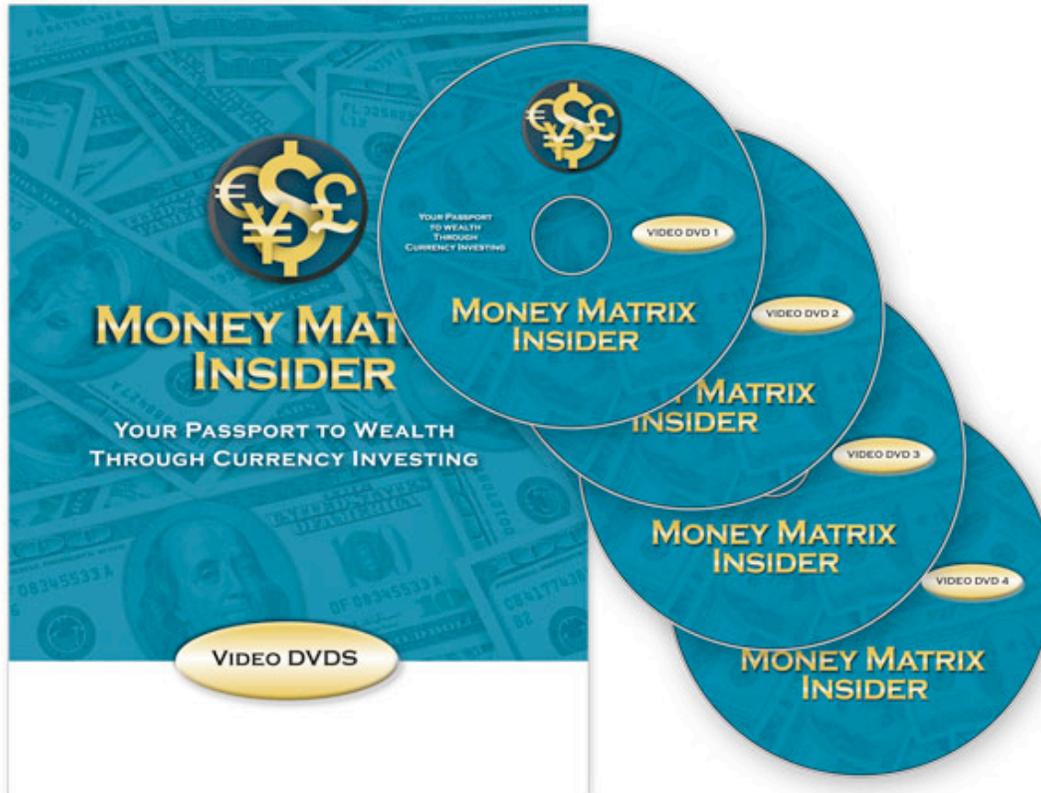

In fact, I'll even show you how to do it all for yourself if you so choose.

You see, I want to ensure you become one of today's robber barons. That's why I've created . . .

I developed the **Money Matrix Insider** Blueprint to teach each of you, step-by-step, the secrets to how I’ve made a fortune in the currency market not only for myself but for my tycoon clientele.

Presented on four discs, I will walk you through everything from how to find the right brokerage house and the basics of currency trading, to my one-of-a-kind model for predicting the biggest winners . . . all the way to setting up your trading account to operate on autopilot so that you can have the luxury of complete control and freedom of your time.

If you want to go on a vacation . . . no problem. You'll learn to make money while you are on a distant tropical island. If you just want to step out to play a round of golf . . . you may pocket \$5,000 by the 14th hole.

And with my system, you only need to put pocket change into this market to capitalize.

Retirement at any age becomes a reality to those who master My FOREX methodology and make smart trades. And any serious investor can.

The instructions will be simple and easy to follow. All you need to do is pop the discs into your DVD player or computer and sit back. There are no cumbersome (and boring) workbooks or tests . . . this isn't middle school. If you are taking tests, you aren't making money.

To supplement the discs you'll be given a highly informative, straightforward, and valuable trading manual so you can continue to discover my proprietary currency philosophy.

You'll also get examples of trades, shortcuts, all the secrets, and most importantly, a list of online brokerages I trust for setting up your account.

(Full disclosure: Newsmax and I are not compensated in any way for giving you this list of companies.)

**And here's the best part . . .
it's yours for FREE.**

If I were to sell it separately, which I probably will in the very near future, I'd charge \$995 for it, but today it's my gift to you [with this special offer](#). I'm going to include it as an incredible piece of the most lucrative of packages.

I want you to succeed the minute you take part in this initiative. Obviously, if you were to just use the course, there would be some level of a learning curve. And that means you'll be missing vital opportunities to profit instantly.

And, that's why I developed a service that will give you the potential to **begin making money right away**. Today, I'm inviting you to become an official member of the **Money Matrix Insider** . . . this is an alliance of modern-day robber barons. An elite club of investors ready to become serious wealth profiteers regardless of experience level. All you need is the drive to succeed, a computer, and an Internet connection.

Here's how I will work for you . . .

- I'll give you recommendations for the trades
- When to get in . . . when to get out . . .
- The safety net exit points . . .
- The profit-taking positions . . .

What New **Money Matrix Insider** Members Have to Say!

I truly feel like I am an INSIDER with you at the helm...

Blessings,

—Tom

Well done Sean, and MMI staff. I am very happy to be on board with you guys. I have learned much and am having fun at the same time. It has been my privilege to be involved with such fine people as yourselves. All the best!

—Don

Wow — Awesome!

—Rehnee

I just started with your service. I've got to tell you that your weekly videos are fantastic! I look forward — with much anticipation — to learning from your video explanations of trends, expectations . . . etc . . . each

You get to make the final investment decisions. Everything is as easy as 1, 2, 3 — and you still are in charge of your financial future!

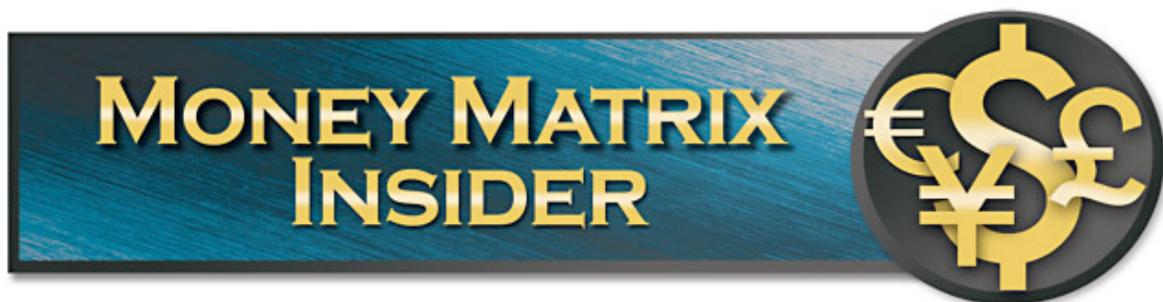

All sent conveniently to your e-mail inbox and phone. It becomes so simple.

When you become a member of this exclusive fraternity . . . I'll immediately ship you the **Money Matrix Insider** Blueprint course for FREE. And you will get instant access to the **Money Matrix Insider** trading service, with which the serious wealth will be made.

As I've stated in this letter, I believe you could make \$137,000 (or more) in the next year alone by following my recommendations.

And the best part is you can start earning in as little as 24 to 48 hours after you sign up for Christopher Ruddy's and my revolutionary initiative..

**I'm Drawing Up the Blueprint . . .
I'm Giving You the Vault's Combination . . .
You Are About to Pull Off the
Most Lucrative of 'Heists' . . .**

The secret of the **Money Matrix Insider** trading service is it's not just one currency investment portfolio . . . but two.

The first portfolio will go after very safe and sound FOREX plays. Newsmax did an extensive review of my trading history before bringing me on to lead this "raid" on the world's currency vault.

My past is phenomenal.

But Christopher Ruddy wanted to see my present-day success firsthand, so he gave

week. THANK YOU!

—Terry

I am having so much fun with this service. I have very little knowledge of investing, though I have done some on my own. So I am very much learning from square one from your service and enjoying it

Thanks, GM

me a mission to use conservative leverage and small amounts of money to build a serious return quickly. Just like he would want my to deliver to you. This way he could see personally how I'd handle recommendations for your money instead of the offshore billionaires I usually do business with.

The result: a verified a 52% return in four months. Annualize that out, and you are staring at an impressive 156% return. I did this using smaller leverage amounts and historically less-risky currencies. And you'll find recommendations like these in my "conservative" portfolio.

If I was offering access to this portfolio by itself, I'd normally charge \$2,495 a year. Not only do I have more to offer, but also you won't pay anywhere near that figure.

We're Looking for Robber Baron Returns Here After All!

A 156% return is nothing to shake a stick at. Especially considering the chump change the stock market has delivered over the years and the prospects of inflation draining the value of all those CDs, bonds, and money market accounts you may be invested in right now. I can't promise these types of returns all the time. But, it can happen.

But 156% return is still not robber baron-esque. And in my world, that's a conservative return. You've read the stories I've told you in this letter. You know there is bigger game to hunt out there.

And for those absolutely stunning plays we'll use the second portfolio which will be a bit more aggressive. Here we'll slice off a small segment of your investment stake to go after those high triple, even quadruple digit returns.

Now, with this portfolio we'll take on a little more risk than we would with the conservative one. Which is why we'll be using only a small piece of your investment pie. The potential returns in this portfolio are downright historic.

Look at what \$250 could turn into if you make the right currency trades. (I warn you, to the naked eye they look unfathomable, but these are hypothetical results that could've been delivered in the currency market over the past few months.)

Investing with the Australian Dollar:

Payout	% Gain	Days in Trade
\$10,400.00	4060%	14 Days
\$2,970.00	1088%	9 Days
\$2,540.00	916%	20 Days

Potential Windfalls From Dominating the Canadian Dollar . . .

Payout	% Gain	Days in Trade
\$6,970.00	2688%	25 Days
\$6,200.00	2380%	27 Days
\$4,570.00	1728%	19 Days

The Opportunity for Immense Wealth With New Zealand Dollars . . .

Payout	% Gain	Days in Trade
\$20,810.00	8224%	13 Days
\$7,120.00	2748%	18 Days
\$6,980.00	2692%	7 Days

This is where your big time paychecks could occur. The returns will be greater . . . the daily interest payoffs will be more sizable. It's all excitement all the time with this portfolio. How many trades do you need like these a year to live a more comfortable life? Not many!

And this is a \$2,995 a year value by itself. And that's a bargain. But here's an even bigger bargain.

So, Let's Review The Tools You Are Going to Use to Pull Off This Profit 'Raid' of Epic Proportions!

- **Two Distinct Portfolios** — One for the more conservative currency plays. Recommendations like the ones I used to deliver that 52 percent return in only four months.

And another portfolio that aims for the high-triple and quadruple-digit gains. The ones that could turn \$250 into five-digit payouts.

You can expect to receive around three to four recommendations a month. Whenever I identify a play, I will issue the trade recommendation with clear cut and simple to follow instructions (including how you can set up the trade on autopilot with profit taking/loss management positions).

I'll give you all of the research and reasoning behind the trade plus

recommendations on how much of your investment capital to allocate to the trade. You then can choose whether you want to follow my recommendations or do your own further research. This service truly allows you to be in control of your own investments and especially your money.

If you have a computer and an e-mail account you can take your shot at the profits to be had. A \$5,490 value!

- **Money Matrix Insider Security Encrypted Web Site** — Inside this vast, password-protected Web site you will be delivered members-only articles, weekly videos and audio commentary, the track record, and the ability to ask me questions or suggest topics to be discussed in weekly commentaries. A \$495 value!
- **Trade Alerts** — Whenever the moment arrives that I believe it's time to exit a trade, I will send you an immediate e-mail to let you know it's time to close the position and take the profits. A \$595 value!
- **Phone Alerts** — Because time is money and you shouldn't have to sit around your computer all day waiting for trading recommendations, you can set up the **Money Matrix Insider** to send all trade notifications to your phone as well as your computer. This way, you can receive this time sensitive material in the quickest way possible. A \$99 value!
- **Weekly Commentary** — Each week, I will wrap up the portfolio and the global circumstances driving the results of the two portfolios. You always will be kept completely "in the know" concerning all relevant factors influencing your money. A \$99 value!
- **Money Matrix Insider Blueprint Home Study Course** — Over the duration of four discs, you will learn the basics of currency investing, how and where to set up an online account, my comprehensive and unique strategy I call the FOREX Diamond Factor, risk-aversion techniques, how to set up your trading on auto pilot, and so much more. You can just pop the discs into your computer or DVD player and absorb the simple-to-grasp concepts. This is truly one of those "teach-a-man-to-fish" scenarios. Also included with the course is a helpful trading manual for review. A \$995 Value!

**Your Total Membership Package
Is Valued at \$7,773 Today!
But Rest Assured . . .**

You'll Be Paying a Fraction of That!

I know Christopher Ruddy's \$1.5 million stake in the **Money Matrix Insider** is money well spent because he has complete faith in my abilities.

And, you should too. So I don't need to ask for a large commitment from you.

Now when the **Money Matrix Insider** charter membership period expired in November, the membership price became \$2,495. But I'm going to knock \$1,000 off that price if you are one of the proactive folks to act early (by "early" I mean one of the first 1,000 to order today . . . because 2.1 million people are receiving this letter right now . . . time is of the essence).

That means you can lock in your membership spot for only \$1,495!
The Same Price Charter Members Paid!

[Make Sure You Are One of the First 1,000 by Claiming Your Spot Here!](#)

And I have one final gift for you.

I'm So Confident That You'll Make a Killing With the Money Matrix Insider . . .

That I've built in an iron clad return policy into your membership.

I have no interest in reserving you a membership spot if you **A)** aren't going to use it and, more importantly, **B)** aren't going to become quite wealthy because of it.

So when you claim your spot, I will authorize my team immediately to grant you a 60-day window to recoup 100% of your membership rate. **For any reason.**

Just call, e-mail, fax, write a letter. Whatever the reason . . . whatever the method. I will refund you every penny of your membership.

I suggest you take the first 60 days to go through the course and follow my recommendations. If you aren't comfortable putting up your own money at first, then paper trade my currency plays. The online brokerages that *I* will recommend

will allow you to use paper trading (pretend money on real trades).

This way you will be completely confident in the results before you put any of your own money on the line.

If after 60 days of using real (or pretend) money on my trades you haven't made not just the cost of the service back but also enough to buy 10 more courses . . . I urge you to ask for your complete refund.

And I'll be happy to oblige. If you have any further questions on the guarantee, I've included a handy terms of service agreement you can look at if you so choose below this promo.

[Click Here to Claim Your Spot!](#)

This venture wasn't created for just strong results. To just beat the market. I created it for robber baron performance. In other words, historic wealth.

Which is why Christopher Ruddy put \$1.5 million of his company's money "on the line."

So let me show you how serious I am.

If I don't give you the opportunity to at least double your money on six of my recommendations over the next year . . .

I'll work for free for the year after that. You'll get one year on the proverbial house. Do you know anybody who likes working for free? I know I don't. So rest

assured I'm going to put together trades that have the opportunity for massive payouts.

**I know you have what it takes to become
an accomplice to the greatest 'heist' in human
history as you raid the \$3.98-trillion-a-day
global currency vault.**

If you want to join the exclusive fraternity of the modern-day robber barons I've described in this letter . . .

If you want the opportunity to grab a \$137,000 (or more) payout in the next year alone . . .

Then I suggest you join me and this incredible initiative today by becoming a charter member to the **Money Matrix Insider**.

**[To lock in your spot all you need to do
is click this link here!](#)**

To Your Success,

Sean Hyman
Chief Investment Strategist
The Money Matrix Insider

P.S.: The "raid" on the largest bank vault on the planet is about to begin. A fresh \$3.98 trillion is getting placed behind its doors right now. The question is, do you want to join a select group of average Americans in legally "pillaging" it? Your payout could be six figures in the next year alone.

P.P.S.: With the 60-day, 100% refund guarantee, you have absolutely nothing to lose and everything to gain by locking in your spot to the **Money Matrix Insider** today. **And by signing up today, you'll save an additional \$1,000.** **[Click here to lock in your spot!](#)**

Plus with the six trade/double-your-money performance guarantee, you get the added comfort of knowing I am is going to do whatever it takes to put money in your pocket so I don't have to work for free.

And I'll also include one final gift. In November we recorded a "hidden" Steve Forbes interview. When you sign up, you'll be able to watch the entire unfettered Steve Forbes interview as many times as you like on the **Money Matrix Insider** Web site.
